

## LM723JAN Voltage Regulator

Check for Samples: [LM723JAN](#)

### FEATURES

- 150 mA Output Current without External Pass Transistor
- Output Currents in Excess of 10A Possible by Adding External Transistors
- Input Voltage 40V Max
- Output Voltage Adjustable from 2V to 37V
- Can be Used as Either a Linear or a Switching Regulator

### Connection Diagram

NOTE: Pin 5 connected to case.

**Figure 1. CDIP Package  
Top View  
See Package J0014A**

### DESCRIPTION

The LM723 is a voltage regulator designed primarily for series regulator applications. By itself, it will supply output currents up to 150 mA; but external transistors can be added to provide any desired load current. The circuit features extremely low standby current drain, and provision is made for either linear or foldback current limiting.

The LM723 is also useful in a wide range of other applications such as a shunt regulator, a current regulator or a temperature controller.

## Equivalent Circuit

Pin numbers refer to metal can package.

## Schematic Diagram

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

### Absolute Maximum Ratings<sup>(1)</sup>

|   |                                 |                                 |
|---|---------------------------------|---------------------------------|
| Pulse Voltage from V <sup>+</sup> to V <sup>-</sup> (50 ms) |                                 | 50V                             |
| Continuous Voltage from V <sup>+</sup> to V <sup>-</sup>    |                                 | 40V                             |
| Input-Output Voltage Differential                           |                                 | 40V                             |

|   | Metal Can                       | 37°C/W                          |
| ESD Tolerance <sup>(3)</sup>                                |                                 | 1200V                           |

- (1) "Absolute Maximum Ratings" indicate limits beyond which damage to the device may occur. Operating Ratings indicate conditions for which the device is functional, but do not ensure specific performance limits. For ensured specifications and test conditions, see the Electrical Characteristics. The ensured specifications apply only for the test conditions listed. Some performance characteristics may degrade when the device is not operated under the listed test conditions.
- (2) The maximum power dissipation for these devices must be derated at elevated temperatures and is dictated by T<sub>JMAX</sub>, θ<sub>JA</sub>, and the ambient temperature, T<sub>A</sub>. The maximum available power dissipation at any temperature is P<sub>d</sub> = (T<sub>JMAX</sub> – T<sub>A</sub>)/θ<sub>JA</sub> or the number given in the Absolute Maximum Ratings, whichever is less. See derating curves for maximum power rating above 25°C.
- (3) Human body model, 1.5 kΩ in series with 100 pF.

### Recommended Operating Conditions

|                                     |                                 |
|-------------------------------------|---------------------------------|
| Input Voltage Range                 | 9.5V to 40V <sub>DC</sub>       |
| Output Voltage Range                | 2V to 37V <sub>DC</sub>         |
| Input-Output Voltage Differential   | 2.5 V to 38V <sub>DC</sub>      |
| Ambient Operating Temperature Range | -55°C ≤ T <sub>A</sub> ≤ +125°C |

### Quality Conformance Inspection

| $V_{OUT}$   | Output Voltage        | $V_{IN} = 12V$ , $V_{OUT} = 5V$ , $I_L = 1mA$                     | (4)   | 4.5            | 5.5   | V           | 1, 2, 3    |

- (1) Unless otherwise specified,  $T_A = 25^\circ C$ ,  $V_{IN} = V^+ = V_C = 12V$ ,  $V^- = 0$ ,  $V_{OUT} = 5V$ ,  $I_L = 1mA$ ,  $R_{SC} = 0$ ,  $C_1 = 100 pF$ ,  $C_{REF} = 0$  and divider impedance as seen by error amplifier  $\leq 10 k\Omega$  connected as shown in Figure 14. Line and load regulation specifications are given for the condition of constant chip temperature. Temperature drifts must be taken into account separately for high dissipation conditions.
- (2) For metal can applications where  $V_Z$  is required, an external 6.2V zener diode should be connected in series with  $V_{OUT}$ .
- (3) Tested for 14 – lead DIP only.
- (4) Setup test for Temp. Coeff.

(1) Figures in parentheses may be used if R1/R2 divider is placed on opposite input of error amp.

(2) Replace R1/R2 in figures with divider shown in Figure 26.

(3) V<sup>+</sup> and V<sub>CC</sub> must be connected to a +3V or greater supply.**Table 2. Formulae for Intermediate Output Voltages**

| Outputs from +2 to +7 volts  | Outputs from +4 to +250 volts  | Current Limiting  |
|--|--|---|
| (Figure 14, Figure 17, Figure 18, Figure 19, Figure 22, Figure 25) | (Figure 20)  |   |
| $V_{OUT} = \left( V_{REF} \times \frac{R2}{R1 + R2} \right)$       | $V_{OUT} = \left( \frac{V_{REF} \times R2 - R1}{2} \right); R3 = R4$ | $I_{LIMIT} = \frac{V_{SENSE}}{R_{SC}}$  |
| Outputs from +7 to +37 volts                                       | Outputs from -6 to -250 volts  | Foldback Current Limiting   |
| (Figure 15, Figure 17, Figure 18, Figure 19, Figure 22, Figure 25) | (Figure 16, Figure 21, Figure 23)                                    | $I_{KNEE} = \left( \frac{V_{OUT} R3}{R_{SC} R4} + \frac{V_{SENSE} (R3 + R4)}{R_{SC} R4} \right)$<br>$I_{SHORT\ CKT} = \left( \frac{V_{SENSE} \times R3 + R4}{R_{SC}} \right)$ |
| $V_{OUT} = \left( V_{REF} \times \frac{R1 + R2}{R2} \right)$       | $V_{OUT} = \left( \frac{V_{REF} \times R1 + R2}{2} \right); R3 = R4$ |   |

## TYPICAL APPLICATIONS

Note:  $R3 = \frac{R1 R2}{R1 + R2}$  for minimum temperature drift

**Figure 14. Basic Low Voltage Regulator ( $V_{OUT} = 2$  to 7 Volts)**

| Typical Performance                      |       |
|--|-------|
| Regulated Output Voltage                 | 5V    |
| Line Regulation ( $\Delta V_{IN} = 3V$ ) | 0.5mV |
| Load Regulation ( $\Delta I_L = 50$ mA)  | 1.5mV |

Note:  $R3 = \frac{R1 R2}{R1 + R2}$  for minimum temperature drift.

R3 may be eliminated for minimum component count.

**Figure 15. Basic High Voltage Regulator ( $V_{OUT} = 7$  to 37 Volts)**

| Typical Performance                      |        |
|--|--------|
| Regulated Output Voltage                 | 15V    |
| Line Regulation ( $\Delta V_{IN} = 3V$ ) | 1.5 mV |
| Load Regulation ( $\Delta I_L = 50$ mA)  | 4.5 mV |

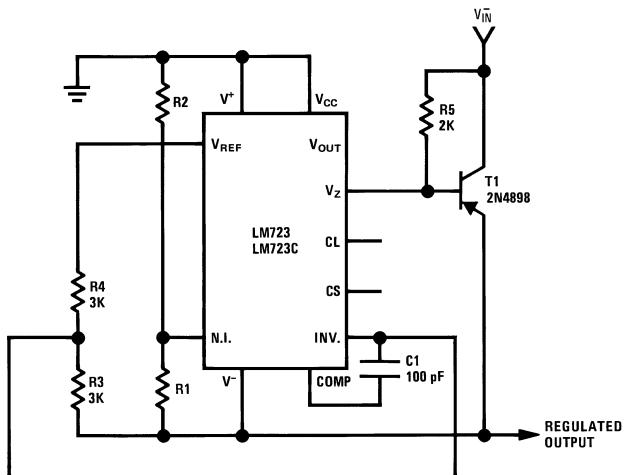

Figure 16. Negative Voltage Regulator

| Typical Performance                               |      |
|---|------|
| Regulated Output Voltage                          | -15V |
| Line Regulation ( $\Delta V_{IN} = 3V$ )          | 1 mV |
| Load Regulation ( $\Delta I_L = 100 \text{ mA}$ ) | 2 mV |

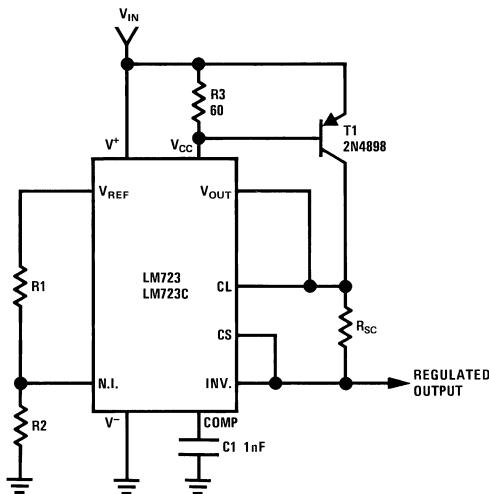

Figure 17. Positive Voltage Regulator (External NPN Pass Transistor)

| Typical Performance                      |        |
|--|--------|
| Regulated Output Voltage                 | +15V   |
| Line Regulation ( $\Delta V_{IN} = 3V$ ) | 1.5 mV |
| Load Regulation ( $\Delta I_L = 1A$ )    | 15 mV  |

**Figure 18. Positive Voltage Regulator (External PNP Pass Transistor)**

| Typical Performance                      |        |
|--|--------|
| Regulated Output Voltage                 | +5V    |
| Line Regulation ( $\Delta V_{IN} = 3V$ ) | 0.5 mV |
| Load Regulation ( $\Delta I_L = 1A$ )    | 5 mV   |

**Figure 19. Foldback Current Limiting**

| Typical Performance                              |        |
|--|--------|
| Regulated Output Voltage                         | +5V    |
| Line Regulation ( $\Delta V_{IN} = 3V$ )         | 0.5 mV |
| Load Regulation ( $\Delta I_L = 10 \text{ mA}$ ) | 1 mV   |
| Short Circuit Current                            | 20 mA  |

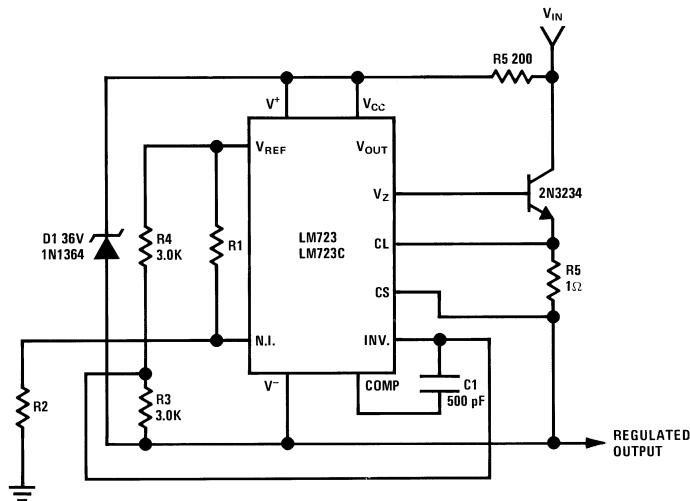

Figure 20. Positive Floating Regulator

| Typical Performance                              |       |
|--|-------|
| Regulated Output Voltage                         | +50V  |
| Line Regulation ( $\Delta V_{IN} = 20V$ )        | 15 mV |
| Load Regulation ( $\Delta I_L = 50 \text{ mA}$ ) | 20 mV |

Figure 21. Negative Floating Regulator

| Typical Performance                               |       |
|---|-------|
| Regulated Output Voltage                          | -100V |
| Line Regulation ( $\Delta V_{IN} = 20V$ )         | 30 mV |
| Load Regulation ( $\Delta I_L = 100 \text{ mA}$ ) | 20 mV |

$L_1$  is 40 turns of No. 20 enameled copper wire wound on Ferroxcube P36/22-3B7 pot core or equivalent with 0.009 in. air gap.

**Figure 22. Positive Switching Regulator**

| Typical Performance                       |       |
|---|-------|
| Regulated Output Voltage                  | +5V   |
| Line Regulation ( $\Delta V_{IN} = 30V$ ) | 10 mV |
| Load Regulation ( $\Delta I_L = 2A$ )     | 80 mV |

$L_1$  is 40 turns of No. 20 enameled copper wire wound on Ferroxcube P36/22-3B7 pot core or equivalent with 0.009 in. air gap.

**Figure 23. Negative Switching Regulator**

| Typical Performance                       |      |
|---|------|
| Regulated Output Voltage                  | -15V |
| Line Regulation ( $\Delta V_{IN} = 20V$ ) | 8 mV |
| Load Regulation ( $\Delta I_L = 2A$ )     | 6 mV |

**Note:** Current limit transistor may be used for shutdown if current limiting is not required.

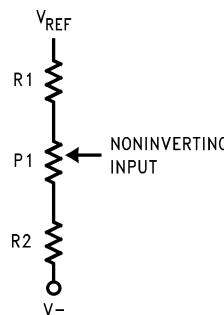

**Figure 24. Remote Shutdown Regulator with Current Limiting**

| Typical Performance                             |        |
|---|--------|
| Regulated Output Voltage                        | +5V    |
| Line Regulation ( $\Delta V_{IN} = 3V$ )        | 0.5 mV |
| Load Regulation ( $\Delta I_L = 50\text{ mA}$ ) | 1.5 mV |

**Figure 25. Shunt Regulator**

|   |        |
|---|--------|
| Regulated Output Voltage                          | +5V    |
| Line Regulation ( $\Delta V_{IN} = 10V$ )         | 0.5 mV |
| Load Regulation ( $\Delta I_L = 100 \text{ mA}$ ) | 1.5 mV |

NOTE: Replace R1/R2 in figures with divider shown in [Figure 26](#)

**Figure 26. Output Voltage Adjust**

<sup>(1)</sup> **Status:** For more details on status, see our [product life cycle](#).

<sup>(2)</sup> **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

<sup>(4)</sup> **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

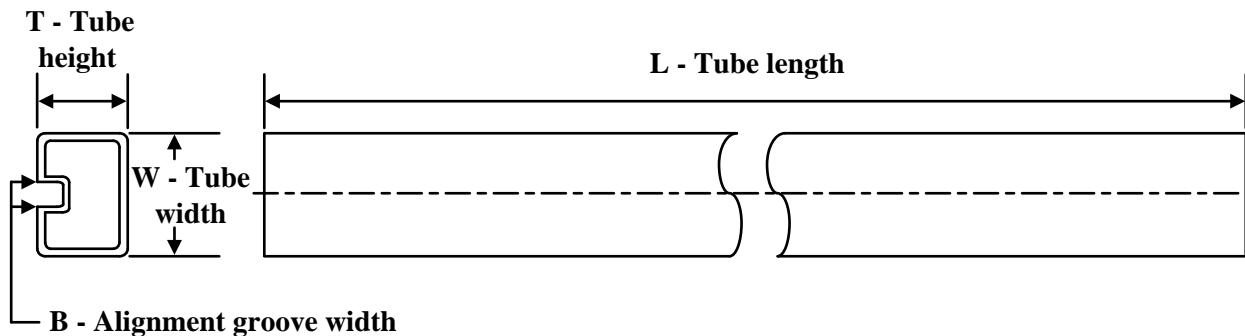

<sup>(5)</sup> **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

**(6) Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
