

Model Usage Notes:**A. Features have been modelled**

1. PSRR is modelled till 1st pole and 1st zero
2. Current Limit
3. Internal fixed Soft Start Time
4. Enable functionality
5. Under Voltage Protection
6. Over Voltage Protection
7. Power Good and It's UV thresholds depends on STRICT bit

B. Features have not been modelled

1. Operating Quiescent Current
2. Shutdown Current
3. Temperature dependent characteristics

C. Application Notes

1. To observe startup behaviour select SS parameter to 0
To observe steady state behaviour select SS parameter to 1
2. Parameter STRICT refers to STRICT bit (1 bit) of CONFIG1 register.
3. Parameter LDO1_VOUT sets output voltage.
