*
* Model Usage Notes:
* A. Features have been modelled
*   1. Hiccup mode is modelled with the hiccup reset time of 1ms
*   2. Adjustable VOUT
*   3. MIN ON Time
*   4. UVLO Protection
*   5. Power Good
*   6. High Side Current Limit
*
* A. Features have not been modelled
*   1. Temperature effects are not modeled.
*
* C. Application Notes
*   1. Parameter MODE helps the device to reach the steady state faster.
*      Keep Mode = 0 to observe startup behaviour.
*      Keep Mode = 1 and appropriate IC on inductor and capacitor to observe for steady state.
