*****
*
* Model Usage Notes:
*
* A. Features have been modelled
* 1. Switching Characteristics and variation with VIN
* 2. Power Good functionality and delay.
* 3. VIN UVLO and high side Current limit.
* 4. Zero current detection and PFM mode.
* 5. Hiccup and foldback during current limit.
* 6. Low side valley current limit is implemented.
*
* B. Features have not been modelled
* 1. Operating Quiescent Current
* 2. Shutdown Current
* 3. Temperature dependent characteristics
* 4. Current through Pins EN,MODE_SYNC,COMP_FSET,FB are not modelled.
*
* C. Application Notes
* 1. The parameter SS has been used to reach the steady state faster.
*    Keep SS = 0 to observe startup behaviour.
*    Keep SS = 1 and appropriate IC on Inductor and capacitor to observe for faster Steady state.
* 2. Ground pins have been tied to 0V internally.
*    Therefore, this model cannot be used for inverting topologies
