

LMS1585A 5A/LMS1587 5A and 3A Low Dropout Fast Response Regulators

 Check for Samples: [LMS1585A](#) , [LMS1587](#)

FEATURES

- **Fast Transient Response**
- **Available in Adjustable, 1.5V, and 3.3V versions**
- **Current Limiting and Thermal Protection**
- **Commercial Temp. Range: 0°C to 125°C**
- **Industrial Temp. Range: -40°C to 125°C**
- **Line Regulation 0.005% (typical)**
- **Load Regulation 0.05% (typical)**
- **Direct Replacement for LT[®] 1585A/87**

APPLICATIONS

- **Pentium[®] processor supplies**
- **PowerPC[®] supplies**
- **Other microprocessor supplies**
- **Low voltage logic supplies**

DESCRIPTION

The LMS1585A and LMS1587 are low dropout positive regulators with output load current of 5A and 3A respectively. Their low dropout voltage (1.2V) and fast transient response make them an excellent solution for low voltage microprocessor applications.

The LMS1585A/87 are available in adjustable versions, which can set the output voltage with only two external resistors. In addition, they are also available in 1.5V and 3.3V fixed voltage versions⁽¹⁾.

The LMS1585A/87 circuits include a zener trimmed bandgap reference, current limiting and thermal shutdown. The LMS1585A/87 series are available in KTT (TO-263) and NDE (TO-220) packages.

(1) Consult factory for other fixed voltage options.

Typical Application

* Required for Stability

**Figure 1. NDE (TO-220)

(Top View)**

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PowerPC is a registered trademark of IBM.

Pentium is a registered trademark of Intel Corporation.

LT is a registered trademark of Linear Technology.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of the Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

Table 1. LMS1585A/LMS1587 Device Options

Part Number	Output Voltage	Operating Temperature	Package Drawing	Package Type	Output Current			
LMS1585AIS-1.5	1.5V	-40°C to 125°C	KTT	TO-263	5A			
LMS1585AIS-3.3	3.3V							
LMS1585ACS-ADJ	Adjustable	0°C to 125°C				NDE	TO-220	5A
LMS1585ACS-1.5	1.5V							
LMS1585ACS-3.3	3.3V							
LMS1585ACT-1.5	1.5V							
LMS1585ACT-3.3	3.3V	-40°C to 125°C	KTT	TO-263	3A			
LMS1587IS-ADJ	Adjustable							
LMS1587IS-1.5	1.5V							
LMS1587IS-3.3	3.3V	0°C to 125°C				NDE	TO-220	3A
LMS1587CS-ADJ	Adjustable							
LMS1587CS-3.3	3.3V							
LMS1587CS-1.5	1.5V	-40°C to 125°C	NDE	TO-220	3A			
LMS1587IT-1.5	1.5V							
LMS1587CT-ADJ	Adjustable	0°C to 125°C	NDE	TO-220	3A			
LMS1587CT-3.3	3.3V							

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

ABSOLUTE MAXIMUM RATINGS⁽¹⁾⁽²⁾

Maximum Input to Output Voltage (V_{IN} to GND)	13V
Power Dissipation ⁽³⁾	Internally Limited
Junction Temperature (T_J) ⁽³⁾	150°C
Storage Temperature Range	-65°C to 150°C
Lead Temperature	260°C, 10 sec
ESD Tolerance ⁽⁴⁾	2000V

- (1) Absolute Maximum Ratings indicate limits beyond which damage to the device may occur. Operating Ratings indicate conditions for which the device is intended to be functional, but specific performance is not ensured. For ensured specifications and the test conditions, see the Electrical Characteristics.
- (2) If Military/Aerospace specified devices are required, please contact the TI Sales Office/ Distributors for availability and specifications.
- (3) The maximum power dissipation is a function of $T_{J(max)}$, θ_{JA} , and T_A . The maximum allowable power dissipation at any ambient temperature is $P_D = (T_{J(max)} - T_A) / \theta_{JA}$. All numbers apply for packages soldered directly into a PC board.
- (4) For testing purposes, ESD was applied using human body model, 1.5 k Ω in series with 100 pF.

ELECTRICAL CHARACTERISTICS

Typicals and limits appearing in normal type apply for $T_j = 25^\circ\text{C}$. Limits appearing in **Boldface** type apply over the entire junction temperature range for operation, 0°C to 125°C for commercial grade and -40°C to 125°C for industrial grade.

		LMS1585A-ADJ $\Delta V_{\text{REF}} = 1\%$, $I_{\text{OUT}} = 5\text{A}$		1.2	1.4	V
		LMS1585A-1.5/LMS1585A-3.3 $\Delta V_{\text{OUT}} = 1\%$, $I_{\text{OUT}} = 5\text{A}$		1.2	1.4	V

(1) All limits are specified by testing or statistical analysis.

(2) Typical Values represent the most likely parametric norm.

(3) Load and line regulation are measured at constant junction temperature, and are ensured up to the maximum power dissipation of 30W. Power dissipation is determined by the input/output differential and the output current. Ensured maximum power dissipation will not be available over the full input/output range.

ELECTRICAL CHARACTERISTICS (continued)

Typicals and limits appearing in normal type apply for $T_j = 25^\circ\text{C}$. Limits appearing in **Boldface** type apply over the entire junction temperature range for operation, 0°C to 125°C for commercial grade and -40°C to 125°C for industrial grade.

(4) The minimum output current required to maintain regulation.

(5) $I_{FULLLOAD}$ is 5A for LMS1585A and 3A for LMS1587.

APPLICATION NOTE

OUTPUT VOLTAGE

The adjustable version develops at 1.25V reference voltage, (V_{REF}), between the output and the adjust terminal. As shown in [Figure 3](#), this voltage is applied across resistor $R1$ to generate a constant current $I1$. This constant current then flows through $R2$. The resulting voltage drop across $R2$ adds to the reference voltage to sets the desired output voltage.

The current I_{ADJ} from the adjustment terminal introduces an output error. But since it is small (120 μ A max), it becomes negligible when $R1$ is in the 100 Ω range.

For fixed voltage devices, $R1$ and $R2$ are integrated inside the devices.

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

⁽⁶⁾ Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer:The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

NDE0003B

KTT0003B

PACKAGE OUTLINE TO-263 - 4.83 mm max height

TRANSISTOR OUTLINE

4215105/C 08/2024

NOTES:

1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
3. Features may not exist and shape may vary per different assembly sites.
4. Reference JEDEC registration TO-263, except minimum lead thickness and minimum exposed pad length.

EXAMPLE BOARD LAYOUT

NOTES: (continued)

5. This package is designed to be soldered to a thermal pad on the board. For more information, see Texas Instruments literature numbers SLMA002 (www.ti.com/lit/slm002) and SLMA004 (www.ti.com/lit/slma004).
6. Vias are optional depending on application, refer to device data sheet. It is recommended that vias under paste be filled, plugged or tented.

TRANSISTOR OUTLINE

SOLDER PASTE EXAMPLE
BASED ON 0.125 mm THICK STENCIL
EXPOSED PAD
60% PRINTED SOLDER COVERAGE BY AREA
SCALE:6X

4215105/C 08/2024

NOTES: (continued)

7. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
8. Board assembly site may have different recommendations for stencil design.

IMPORTANT NOTICE AND DISCLAIMER

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATA SHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES "AS IS" AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you will fully indemnify TI and its representatives against, any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI's products are provided subject to [TI's Terms of Sale](#) or other applicable terms available either on [ti.com](https://www.ti.com) or provided in conjunction with such TI products. TI's provision of these resources does not expand or otherwise alter TI's applicable warranties or warranty disclaimers for TI products.

TI objects to and rejects any additional or different terms you may have proposed.
